

FILTER CARTRIDGE

RO-10F

REPLACEMENT INSTRUCTIONS

1. Turn clockwise to loosen and remove the cartridge from cap.
2. Align the cartridge with the central cap, then slightly push it into the hole.
3. Turn counter clockwise to tighten the cartridge.
4. Flush 4 gallons of water through the new cartridge filter before use.

SPECIFICATIONS

Optimal Inlet TDS: $\leq 500\text{ppm}$

Chlorine Level: $\leq 0.2\text{ppm}$

Rejection Rate: $\geq 95\%$

Inlet Water Pressure (Min/Max): 70-290psi

Inlet Water Temperature (Min/Max):

5°C-45°C

Max Flow: 0.19L/Min

CAUTION

Do not use on biologically unsafe water without adequate prior disinfection.

FUNCTION

Reverse Osmosis Membrane removes bacteria, heavy metals, salt, dissolved matter and chemicals.

USAGE

Implemented as RO system stage.
